

SRIKAR RAVOORI

React.js Developer | 4.5+ Years | Next.js, Redux Toolkit, TypeScript
Hyderabad, Telangana | 9948800149 | srikar.ravoori@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

React.js Developer with 4.5 years of experience building and maintaining scalable, responsive web applications using React.js, Next.js, Redux Toolkit, and TypeScript. Skilled in developing reusable component libraries, integrating REST APIs, and working within performance-optimized architectures using route-based lazy loading and code splitting. Experienced in cross-functional collaboration with backend teams in Agile environments, delivering maintainable, production-grade frontend solutions.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Next.js (dynamic/slug-based routing), Redux Toolkit, React Router, React Hook Form, Yup, Ant Design, Bootstrap, React-Bootstrap, Styled Components, AG Grid

Performance & Practices: Route-based lazy loading & code splitting, reusable component architecture, form validation, REST API integration, Agile/Scrum

Databases: SQL Server, MongoDB

Tools: Git, GitHub, Bitbucket, VS Code

PROFESSIONAL EXPERIENCE

Weblite Apps (India) Pvt Ltd — React.js Developer

Aug 2024 – May 2026

Client Project: LIC Mutual Fund | Hyderabad, Telangana | Team size: 5

- Built and maintained production React.js modules for a mutual fund platform, working within a route-based lazy-loading structure (React.lazy/Suspense) to keep initial bundle size and load times low as new features shipped.
- Implemented state management using Redux Toolkit to manage shared application state across multiple modules, improving data consistency and reducing prop-drilling.
- Built reusable, configurable React components (forms, tables, modals) adopted across multiple modules to cut duplicate development effort and keep the UI consistent.
- Partnered directly with backend engineers to design and integrate REST API contracts for new features, resolving data-shape and edge-case issues before release.
- Followed code review and Git branching practices within a 5-member team to maintain code quality and readability.

GAC Digital Private Limited — Frontend Developer

Apr 2021 – Mar 2023

Projects: GAC Portal (internal employee portal) & Car and General | Hyderabad, Telangana

- GAC Portal: Developed and maintained the Claim Request and Timesheet modules, building form-heavy workflows using React Hook Form for form state and Yup for schema-based validation.
- GAC Portal: Migrated legacy class components to functional components with React Hooks, and implemented UI using React-Bootstrap and Styled Components.
- GAC Portal: Managed cross-component state using React-Redux to keep employee data (claims, timesheets) in sync across the portal.
- Car and General: Built responsive, multilingual web pages using Next.js, implementing internationalization (i18n) and Next.js dynamic (slug-based) routing to support multiple markets/locales.
- Both projects: Collaborated closely with backend teams to integrate REST APIs and translate business requirements into functional UI.
