

SRIKAR RAVOORI

React.js Developer | 4.5+ Years | React.js, Next.js, Redux Toolkit, TypeScript, REST APIs

Hyderabad, Telangana | 9948800149 | srikar.ravoori@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

React.js Developer with 4.5+ years of experience designing and maintaining scalable, responsive, production-grade web applications using React.js, Next.js, Redux Toolkit, and JavaScript (ES6+), with hands-on TypeScript upskilling in progress. Skilled in building reusable component libraries, integrating REST APIs, and implementing performance-optimized architectures through route-based lazy loading and code splitting. Experienced in Agile/Scrum environments, cross-functional collaboration with backend teams, and delivering maintainable frontend solutions on schedule.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript (in progress)
- **Frameworks & Libraries:** React.js, Next.js (dynamic/slug-based routing), Redux Toolkit, React-Redux, React Router, React Hook Form, Yup, Ant Design, Bootstrap, React-Bootstrap, Styled Components, AG Grid
- **Core Competencies:** Route-based lazy loading & code splitting, reusable component architecture, form validation & schema design, REST API integration, responsive UI development, internationalization (i18n), Agile/Scrum
- **Databases:** SQL Server, MongoDB
- **Tools & Practices:** Git, GitHub, Bitbucket, VS Code, code review & Git branching workflows

PROFESSIONAL EXPERIENCE

React.js Developer — Webile Apps (India) Pvt Ltd

Aug 2024 – May 2026

Client Project: LIC Mutual Fund | Hyderabad, Telangana | Team size: 5

- Built and maintained production React.js modules for a mutual fund platform within a route-based lazy-loading architecture (React.lazy/Suspense), keeping initial bundle size and load times low as new features shipped.
- Implemented state management with Redux Toolkit to manage shared application state across multiple modules, improving data consistency and reducing prop-drilling.
- Built reusable, configurable React components (forms, tables, modals) adopted across multiple modules, cutting duplicate development effort and keeping the UI consistent.
- Partnered directly with backend engineers to design and integrate REST API contracts for new features, resolving data-shape and edge-case issues before release.
- Followed code review and Git branching practices within a 5-member team to maintain code quality, readability, and release stability.

Frontend Developer — GAC Digitals Private Limited

Apr 2021 – Jan 2024

Projects: GAC Portal (internal employee portal) & Car and General | Hyderabad, Telangana

- Developed and maintained the Claim Request and Timesheet modules on GAC Portal, building form-heavy workflows using React Hook Form for form state and Yup for schema-based validation.
- Migrated legacy class components to functional components with React Hooks, and implemented UI using React-Bootstrap and Styled Components.
- Managed cross-component state using React-Redux to keep employee data (claims, timesheets) in sync across the portal.
- Built responsive, multilingual web pages for Car and General using Next.js, implementing internationalization (i18n) and dynamic (slug-based) routing to support multiple markets/locales.
- Collaborated closely with backend teams across both projects to integrate REST APIs and translate business requirements into functional UI.

EDUCATION

B.Sc. Computer Science — Kakatiya University
